### REASONS FOR ALLOWANCE

1. Applicant's arguments, see page 7, line 10 through page 8, line 9 of the response, filed 12 May 2005, with respect to the support in the priority application for claims 9-11 have been fully considered and are persuasive. In view of applicant's arguments, it is clear that claims 9-11 are  
5 entitled to the benefit of the filing date of the priority application (21 December 2000), so that Kalker et al. '747 does not qualify as prior art against these claims. The prior art rejections of claims 9-11 have been withdrawn.

2. The following is an examiner's statement of reasons for allowance: Claims 1-8 remain allowable for the reasons set forth in the previous Office Action. In view of applicant's  
10 arguments regarding the support for claims 9-11 in the parent provisional application, Kalker et al. '747 fails to qualify as prior art against claims 9-11, as pointed out more fully above. None of the other prior art teaches or suggests defining a calibration signal comprising a plurality of components in the Fourier domain and setting the polarities of the components in accordance with payload data prior to combining the calibration signal with a digital content object, as  
15 required by claim 9, so that claims 9-11 are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

20 3. Claims 1-12 are allowed.
